CAPSTONE PANELISTS

College of Computer Studies
Silliman University
Hibbard Avenue, Dumaguete City

Greetings,

We would like to inform you, that our capstone group in charge of the "**Silliman University Digital Repository: A Digital Archive for Silliman University Academic Papers**" would like to make changes regarding the database that will be used for our website. The reasoning is as follows.

Our original plan of having firebase as our database for our capstone project backfired on us because of some dependencies it requires us to install. One of these dependencies has an error stating "Deprecated module reverting back to json". This error occurs in our system's authentication part, which is a vital module for our project to function. Our solution to this problem is to change our database and use "myPHPadmin" to create a database locally first and then use a hosting site like "Hostinger" to import that database to make it online. This change will not affect any other part of the website mentioned in our documentation

With this letter, we kindly ask for your acknowledgment of the changes that our group will make to our project. Our group is grateful for your time, feedback, and guidance for the duration of our capstone project.

We thank you for your kind consideration regarding this matter.

Sincerely,

Kyle Angelee Estabillo

Renz Joshua B. Labiaga

Deanne Mitchill B. Agir
